

Crotch Strap

Fitting Guide

How to wear your crotch strap with your foam or inflatable jacket:

1. Pass the end of the crotch strap around the waist belt at the back of the lifejacket and through the twisted loop end of the crotch strap.
2. Untwist the loop to form a neat cow hitch.
3. Unclip the adjustable part.
4. Thread loop onto the lifejacket belt and position at the front.
5. Clip two parts together.
6. Adjust the length for ergonomic, comfortable movement.
